

# DRYAIR HEATING SYSTEMS

## THE ULTIMATE HEATING SYSTEM THAT ASSURES CLEAN, DRY HEAT FOR ANY SIZE CONSTRUCTION PROJECT.

### Versatile Set-Up & Heat Delivery

*Multiple sizes allow individualized approach to each heating project*

- System heating module can be positioned anywhere on site
- Computer software allows for precise calculations
- Clean, dry heat keeps jobs on schedule

### Delivers Clean, Dry Air

*Heat is provided by liquid-to-air transfer*

- No direct flame burners, so it does not produce moisture or noxious fumes
- Faster drying of drywall, paint, stucco, and concrete
- Adjustable hose and coupling system reduces jobsite clutter for greater neatness and safety

### Increases Productivity

*Automatic temperature control and no-flame heat exchangers reduce supervision requirement*

- Portable exchangers deliver heat only where it is needed
- Thermostatically controlled exchangers eliminate hot spots, maintaining desired temperature throughout job site
- Quick-connect couplers allow easy set-up and maneuverability
