

## CONTRACTOR MARKET NEW PRODUCT BULLETIN *400W Metal Halide Temporary Lights*

Coleman Cable introduces 400W Metal Halide Temporary Lights to our Luma-Site® line of temporary lighting products. The new Luma-Site® Metal Halide series saves energy with a 400W bulb that lasts over 20,000 hours and emits 36,000 lumens.

Save labor time on every jobsite with the easy, quick installation of the 6ft 15 amp cord and spring-loaded hanger. The re-usable 400W Metal Halide Temporary Lights emit more light and use less energy than traditional stringlights. The open-air, quad-tap ballast with (2) knock-outs also allow for hard-wiring applications.

Coleman Cable's Luma-Site® 400W Metal Halide units are UL/cUL Listed and suitable for damp locations. All three guard designs allow for full lighting and two models have "sky friendly" designs for directional lighting.

Three models are NEC 2005 Compliant.

### **Features & Benefits**

- Provide 36,000 lumens (28,000 avg lumens)
- 20,000 hours bulb life
- Quick plug-in installation with a 18/3 SJTW 6ft cord
- Easy-to-use spring-loaded hook for quick hanging
- Quad-tap ballast (120v, 208v, 240v, 277v)
- Fixture may be hard-wired for local codes
- Two models have a reflector for directional & "Sky-friendly" lighting
- Three guard designs include:
  - 10" Pyramid Wire Guard
  - 16" "Sky-friendly" Dome Reflector
  - 10" "Sky-friendly" Wire with 1/2 Removable Reflector
- Convenient packaging includes housing, bulb and guard
